Are VIRUSES A Big Impact To Your Business ?

With not more than 3 MONTHS in 2004, businesses in Malaysia are facing an uphill battle preventing rampant viruses from entering their network:

Bagle, MyDoom, DoomJuice, Nachi, Netsky and the list goes on and on.....

“90-95% of all companies have desktop and email virus protection- yet 82% of companies admit to having a virus outbreak” Source from ICSA LAB. Why?

- Firewall is not enough, major PORTS are still open while you are connected to the internet for 24 hours a day
- Exposed to Blended Threats via Web-Mail, IM, P2P and Browser Activities
- Conventional Anti Virus is SLOW, INSUFFICIENT and VULNERABLE
- 30% increase in SPAM – A breeding ground for virus activity
- Too many Windows vulnerabilities being EXPLOITED

Highlights in RF 8.7

Upgraded key features:

- IBM Lotus Notes/Domino 6.0, 6.5 Support
- Advanced Enterprise Level -Alerting and Monitoring
- Certification with Microsoft Windows 2003
- True SMS support
- Broadened Functionality with Integrations to Leading Messaging, Workflow and Multifunction Devices

“STOPS VIRUSES, WORMS & MALICIOUS CODES AT THE GATEWAY, PREVENTION IS ALWAYS BETTER THAN CURE”

We understand that security is not just about technology, but a **MAJOR business issue**. Let us help solve your vulnerabilities so you can fully focus on your business.
